*Please check with us to confirm full software functionality with your machine model

SpaceLogger®

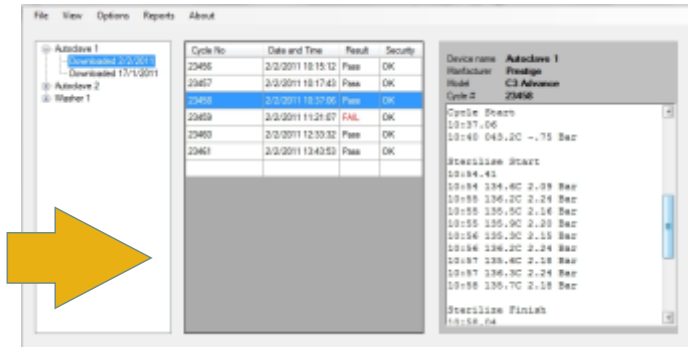

SD card for storage of cycle information.

Data is **encrypted** and proofed against tampering.

Easily transferred to a PC for data upload to the SpaceLogger Software

SpaceLogger PC Software maintains a secure duplicated electronic record of every cycle on a PC.

Encrypted files are deciphered but may not be altered.

Archived data is easily navigated, with simple viewing of individual cycle records.

Includes straightforward reporting of end of period activity to PDF - ideal for auditing purposes.
